NEW MEXICO BUSINESS

CURRENT ECONOMIC REPORT

Vol. 3 No. 2 March 1982

Current Economic Developments in New Mexico

At the national level, recent economic statistics indicate some improvement in economic activity relative to levels registered in recent months. Industrial production, for example, increased 1.6 percent in February after having declined during each of the six previous months; retail sales also increased 1.6 percent in February following a 1.5 percent decline in January. In addition, housing starts increased 6.5 percent in February to a 953,000-unit annual rate which, although weak by historical standards, represents the strongest level of activity in the housing sector since last July. On the inflation front, recent data show continued moderation as the Consumer Price Index rose only 0.2 percent in February, while the Producer Price Index fell 0.1 percent during the same month. The continued easing of inflationary pressures in recent months largely reflects the decline of world oil prices due to the current oil glut as well as the effect of the current recession which has reduced the demand for goods and services and thus restrained prices.

Despite the February statistics which show general improvement in the national economy, most economists are reluctant to suggest that the current recession has run its course. For one thing, much of the improvement in February is seen as a temporary upturn from very weak January levels. Secondly, interest rates remain at extraordinarily high levels in light of the ongoing recession which will continue to have a particularly strong negative impact on the credit-sensitive sectors of the economy in the immediate future. Finally, the index of leading economic indicators declined 0.3 percent in February, marking the tenth consecutive monthly decline in this measure of future economic activity. In light of the fact that this index usually exhibits several months of positive readings prior to an economic recovery, most economists do not anticipate an economic recovery until the third quarter of this year when the federal income tax reductions scheduled for July begin to take effect.

The New Mexico economy continues to experience the modest growth which was registered in 1981. Total employment on a seasonally adjusted (SA) basis in January was 2.1 percent above the level registered in January 1981, while the state's civilian labor force recorded a slightly smaller annual increase of 2.1 percent (SA) in January. As a result, the unemployment rate registered a small decline to 7.2 percent (SA) in January which represents a 2.3 percent improvement relative to the unemployment rate recorded one year earlier. However, the significant increase in new unemployment insurance claims in January associated with recent layoffs in the manufacturing and mining sectors points toward a likely rise in the state's unemployment rate in the near future.

In the construction sector, high mortgage interest rates continue to depress activity in the residential subsector. The value of residential building permits fell substantially in the final two quarters of 1981, and data for January show a 24.9 percent (SA) yearly decline in this category. In contrast, nonresidential construction activity has fared somewhat better as indicated by the 54.1 percent annual increase in nonresidential construction contracts registered in January.

Sluggish market conditions in conjunction with high interest rates have reduced the demand for many kinds of durable and nondurable goods which is reflected in statewide manufacturing employment totals. The number of jobs in the manufacturing sector experienced declines throughout 1981 and this pattern was again evident in January, as the number of manufacturing jobs fell on an annual basis by 7.1 percent (SA).

Retail trade employment has experienced generally strong growth since the third quarter of last year, and in January stood at a level which was 6.1 percent (SA) above that recorded in January 1981. State and federal income tax reductions which took effect in July and October, respectively, together with a sharp decline in the inflation rate, have acted to boost real disposable income growth in the state which has apparently had a positive effect on consumer spending and, in turn, retail trade employment. Employment in the wholesale trade

* Seasonally adjusted figures are economic time series which have had seasonal variations removed with statistical processes. These purely seasonal variations include the effects of: the opening and closing of school, the annual pattern of seasons (especially applicable to agricultural data), holidays, and other annually recurring events which influence economic activity. By removing these seasonal variations from raw economic data, month-to-month analysis of trends and unusual fluctuations in economic activity is facilitated.

1980 Census of Population and Housing

As reported in the January–February 1982 issue of *New Mexico Business*, the Bureau of Business and Economic Research will be receiving and disseminating all 1980 Census data for the state. Each month *New Mexico Business* will publish selected data from recent Census Bureau releases.

In this issue, rather than publishing actual data, we are presenting background information on what kind of data are available now and what will be available over the next two years. First is a publication schedule with detailed descriptions of census materials and tentative release dates. An outline of the 59 tables on Summary Tape File 1 (STF1) appears next. STF1 is the first of five computer tapes to be released on the 1980 Census and contains data for the state, counties, cities and smaller geographical areas. Copies of computer tapes, printouts, tables, and census maps are available from the BBER on a cost-reimbursable basis. The fee schedule at the end of this section lists the cost for these materials. Special computer runs and analysis of census materials can also be provided by the BBER upon request. Limited funding makes it necessary for us to charge for these materials and services; however, all printed reports and hard copy of computer tapes are available to the public at BBER's Data Bank during regular business hours.

Please direct all census-related questions and orders for materials to Robyn Mewshaw (505/277-6626).

Tentative Publication Dates and Description of Reports and Summary Tape Files

Advance Reports

Series PHC80-V **FINAL POPULATION AND HOUSING UNIT COUNTS**

Available now — These reports present provisional population counts classified by race and Spanish origin and also final housing unit counts prior to their publication in the final reports. These figures supersede the preliminary counts. Final counts are shown for the following areas: states, counties, county subdivisions, incorporated places, and congressional districts as delineated for the 96th Congress. There is one report for each state and a U.S. Summary report showing counts for the United States, regions, divisions, states, and congressional districts.

Final Reports

Series PHC80-1 **BLOCK STATISTICS**

Available now — These reports present population and housing unit totals and statistics on selected characteristics based on complete-count data. Statistics are shown for individual blocks in urbanized areas, for selected blocks adjacent to urbanized areas, for blocks in places of 10,000 or more inhabitants, and for blocks in areas which contracted with the Census Bureau to provide block statistics. The

set of reports consists of 375 sets of microfiche (no printed reports), and includes a report for each SMSA, showing blocked areas within the SMSA, and a report for the state. In addition to microfiche, printed detailed maps showing the blocks covered by the particular report are available.

Series PHC80-2 **CENSUS TRACTS**

To be issued: late 1982–mid-1983

Statistics for most of the population and housing subjects included in the 1980 census are presented for census tracts in SMSA's and in other tracted areas. Some tables show complete-count data and others, sample-estimate data. Most statistics are presented by race and Spanish origin for areas with at least a specified number of persons in the relevant population groups. There is one report for each SMSA, as well as one for the states covering the tracted areas outside SMSA's.

Series PHC80-3 **SUMMARY CHARACTERISTICS FOR GOVERNMENTAL UNITS AND STANDARD METROPOLITAN STATISTICAL AREAS**

To be issued: Spring 1982–Fall 1982

Statistics are presented on total population and on complete-count and sample population characteristics such as age, race, education, disability, ability to speak English, labor force, and income, and on total housing units and housing characteristics such as value, age of structure, and rent. These are shown for the following areas: states, SMSA's, counties, county subdivisions, and incorporated places.

Series PHC80-4 **CONGRESSIONAL DISTRICTS OF THE 98th CONGRESS**

To be issued: Spring 1982–late 1982

This report presents complete-count and sample data for congressional districts of the 98th Congress. The report reflects redistricting now underway in anticipation of the 1982 elections and the special needs of the congressional audience. One report will be issued for each of the 50 states and the District of Columbia.

Series PHC80-SI-1 **PROVISIONAL ESTIMATES OF SOCIAL, ECONOMIC, AND HOUSING CHARACTERISTICS**

Available now

This report presents provisional estimates based on sample data collected in the 1980 census. Data on social, economic, and housing characteristics are shown for the United States as a whole, each state, the District of Columbia, and SMSA's of 1,000,000 or more inhabitants. These data are based on a special subsample of the full census sample. The sample, which represents about 1.6 percent of the total population, was developed to provide users with early data on characteristics of the population and housing units.

1980 Census of Population

Final Reports

Volume 1.

CHARACTERISTICS OF THE POPULATION

This volume presents final population counts and statistics on population characteristics. The volume consists of four chapters: chapters A, B, C, and D. Chapters A and B present data collected on a complete count basis, and chapters C and D present estimates based on sample information, except for outlying areas where all data are collected on a complete-count basis. Chapters B, C, and D present most statistics by race and Spanish origin for areas with at least a specified number of the relevant population groups.

Series PC80-1-A Chapter A

NUMBER OF INHABITANTS

Available now — Final population counts are shown for the following areas: states, counties, county subdivisions, incorporated places and census designated places, SMSA's, and urbanized areas. Selected tables contain population counts by urban and rural residence. Many tables contain historical statistics from previous censuses.

Series PC80-1-B Chapter B

GENERAL POPULATION CHARACTERISTICS

To be issued: early 1982–mid-1982 — Statistics on household relationship, age, race, Spanish origin, sex, and marital status are shown for the following areas: states, counties (by rural residence), county subdivisions, places of 1,000 or more inhabitants, SMSA's, urbanized areas, and American Indian reservations.

Series PC80-1-C Chapter C

GENERAL SOCIAL AND ECONOMIC CHARACTERISTICS

To be issued: Fall 1982–early 1983 — Data for subjects shown in the PC80-1-B reports are presented in more detail in PC80-1-C. Also shown are statistics on nativity, state or country of birth, citizenship and year of immigration for the foreign-born population, language spoken at home and ability to speak English, ancestry, fertility, family composition, type of group quarters, marital history, residence in 1975, journey to work, school enrollment, years of school completed, disability, veteran status, labor-force status, occupation, industry, class of worker, labor-force status in 1979, income in 1979, and poverty status in 1979. Each subject is shown for the following areas: states, counties (by rural and rural-farm residence), places of 2,500 or more inhabitants, SMSA's, urbanized areas, and American Indian reservations.

Series PC80-1-D Chapter D

DETAILED POPULATION CHARACTERISTICS

To be issued: mid to late 1983 — Statistics on population characteristics are presented in considerable detail and cross-classified by age, race, Spanish origin, and other characteristics. Each subject is shown for the state, and some subjects are also shown for rural residence at the state level. Most subjects are shown for SMSA's of 250,000 or more inhabitants, and a few are shown for central cities of these SMSA's.

Series PC80-2 Volume 2.

SUBJECT REPORTS

To be issued: beginning 1983 — Each of the reports in this volume focuses on a particular subject. Cross-tabulations of population characteristics are shown on a national, regional, and divisional level. A few reports show statistics for states, large cities, SMSA's or American Indian reservations. Separate reports are tentatively planned on the following characteristics: racial and ethnic groups, type of residence, fertility, families, marital status, migration, education, employment, occupation, industry, journey to work, income, poverty status, and other subjects.

Note that the preparation of subject reports is dependent upon availability of funding in 1983.

Series PC80-S1 **SUPPLEMENTARY REPORTS**

These reports present special compilations of 1980 census statistics dealing with specific population subjects. The reports tentatively include the following:

Available now	1.	PC80-SI-1	Age, Sex, Race, and Spanish Origin of the Population by Regions, Divisions, and States: 1980
"	2.	PC80-SI-2	Population and Households by States and Counties: 1980
"	3.	PC80-SI-3	Race of Population by States: 1980
"	4.	PC80-SI-4	Population and Households for Census Designated Places: 1980
"	5.	PC80-SI-5	Standard Metropolitan Statistical Areas and Standard Consolidated Statistical Areas: 1980
	6.	Unassigned	Nonpermanent Residents by State and County: 1980
	7.	Unassigned	Population and Housing Unit Counts for Identified American Indian Areas and Alaska Native Villages: 1980
	8.	Unassigned	Persons of Spanish Origin by State: 1980

1980 Census of Housing

Final Reports

Volume 1.

CHARACTERISTICS OF HOUSING UNITS

This volume presents final housing unit counts and statistics on housing characteristics. The volume consists of two chapters for each area, chapters A and B. Chapter A presents data collected on a complete-count basis. Chapter B presents estimates based on sample information, except for outlying areas where all data are collected on a complete-count basis. Both chapters present most statistics by race and Spanish origin for areas with at least a specified number of the relevant population groups.

Series HC80-1-A Chapter A

GENERAL HOUSING CHARACTERISTICS

To be issued: early 1982–mid-1982

Statistics on units at address, tenure, condominium status, number of rooms, persons per room, plumbing facilities, value, contract rent, and vacancy status are shown for the following areas: states, counties, county subdivisions, places of 1,000 or more inhabitants, SMSA's, urbanized areas, and American Indian reservations. Selected tables contain housing characteristics for urban and rural areas.

Series HC80-1-B Chapter B

DETAILED HOUSING CHARACTERISTICS

To be issued: Fall 1982–early 1983

Some subjects included in the HC80-1-A reports are also covered in this report. Additional subjects covered include units in structure, year moved into unit, year structure built, heating equipment, fuels, air conditioning, water and sewage, gross rent, and selected monthly ownership costs. The statistics are shown for the following areas: states, counties, places of 2,500 or more inhabitants, SMSA's, urbanized areas, and American Indian reservations. Selected tables show housing characteristics for rural-farm and rural-nonfarm residence at the state and county level.

Series HC80-2 Volume 2.

METROPOLITAN HOUSING CHARACTERISTICS

To be issued: mid to late 1983 — This volume presents statistics on microfiche (tentatively, no printed reports planned) for most of the 1980 housing census subjects in considerable detail and cross-classification. Most statistics are presented by race and Spanish origin for areas with at least a specified number of the relevant population groups. Data are shown for states, SMSA's and their central cities, and other cities of 50,000 or more inhabitants.

Series HC80-3 Volume 3.

SUBJECT REPORTS

To be issued: beginning 1983 — Each of the reports in this volume focuses on a particular subject. Detailed sample estimates and cross-tabulations of housing characteristics are provided on a national, regional, and divisional level. Separate reports are tentatively planned on housing of the elderly, mobile homes, and American Indian households.

Series HC80-SI-1 **SUPPLEMENTARY REPORT—Selected Housing Characteristics by States and Counties: 1980**

Available now — This report presents statistics from the 1980 Census of Housing on general characteristics of housing units for the 50 states and the District of Columbia, counties, and independent cities.

COMPUTER TAPES

Summary Tape Files—General

In addition to the printed and microfiche reports, results of the 1980 census also are provided on computer tape in the form of summary tape files (STF's). These data products have been designed to provide statistics with greater subject and geographic detail than is feasible or desirable in printed and microfiche reports. The STF data are made available, subject to suppression of certain detail where necessary to protect confidentiality, at nominal cost (see following fee schedule).

There are five STF's, and the amount of geographic and subject detail presented varies. STF's 1 and 2 contain complete-count data, and STF's 3, 4, and 5 contain sample-estimate data. Note that the term "cells" used below refers to the number of subject statistics provided for each geographic area. The number of cells is indicative of the complexity of the subject content of the file.

Summary Tape Files

STF 1 Available now — This file provides 321 cells of complete-count population and housing data. (See outline of STF 1 tables on page 14.) Data are summarized for the state, urbanized areas, congressional districts, counties, county subdivisions, places, census tracts, enumeration districts in unblocked areas, and blocks and block groups in blocked areas. This file set includes data shown in the PHC80-1, PHC80-3, and PC80-1-A reports.

STF 2 To be available: early 1982 mid-1982 — This file contains 2,292 cells of detailed complete-count population and housing data, of which 962 are repeated for race and/or Spanish origin groups present in the tabulation area. Data are summarized for the state, urbanized areas, counties, county subdivision, places of 1,000 or more inhabitants, census tracts, and American Indian reservations. This file set includes data shown in the PHC80-2, PC80-1-B, and HC80-1-A reports.

STF 3
To be available: Spring 1982–Fall 1982

This file contains 1,126 cells of population and housing data estimated from the sample for the same area as in STF 1, excluding blocks. This file set includes data shown in the PHC80-3 reports. In addition, the Census Bureau is exploring the possibility of producing STF 3 data for 5-digit ZIP Code areas on a cost-reimbursable, special-tabulation basis.

STF4
To be available: mid-1982–late 1982

This file is the geographic counterpart of STF 2, but the number of cells of data is approximately three times greater. STF 4 provides detailed population and housing data estimated from the sample, some of which are repeated for race, Spanish origin, and ancestry groups. Data are summarized for areas similar to those shown for STF 2, except that data for places are limited to those with 2,500 or more inhabitants. This file set includes data shown in the PHC80-2, PC80-1-C, and HC80-1-B reports.

STF 5
To be available: mid to late 1983

This file contains over 100,000 cells of population and housing data estimated from the sample and provides highly detailed tabulations and cross-classifications for states, SMSA's, and counties and cities of 50,000 or more inhabitants. Most subjects are classified by race and Spanish origin. This file set includes data shown in the PC80-1-D and HC80-2 reports.

Other Computer Tape Files

P.L. 94-171 Population Counts
Available now

In accordance with Public Law (P.L.) 94-171, the Census Bureau provided population tabulations to all states for legislative reapportionment/redistricting. The file was issued on a state-by-state basis. It contains the final population counts classified by race and Spanish origin. The data are tabulated for the following levels of geography as applicable: states, counties, county subdivisions, incorporated places, census tracts, block groups, and blocks or enumeration districts. For states participating in the voluntary program to define election precincts in conjunction with the Census Bureau, the data are also tabulated for election precincts. (Note: New Mexico did not participate in this program.)

Master Area Reference File (MARF)
To be available: 9/81–early 1982

This geographic reference file is an extract of STF 1 designed for those who require a master list of geographic codes and areas, along with basic census counts arranged hierarchically from the state down to the block group and enumeration district level. The file contains records for states, counties, county subdivisions, places, census tracts, enumeration districts in unblocked areas, and block groups in blocked areas. Each record shows the total population by five race groups, population of Spanish origin, number of housing units, number of households, number of families, and a few other items.

MAPS

Maps necessary to define areas are generally published as part of the corresponding reports. Detailed map packages showing the blocks in the *1980 Census of Population and Housing Block Statistics* reports (PHC80-1) must be purchased separately. Maps necessary to define enumeration districts, tracts, etc. are available from the BBER Data Bank (see fee schedule).

AREAS COVERED IN REPORTS AND SUMMARY TAPE FILES (STF'S)

Geographic coverage and data detail often differ among printed reports, microfiche, and summary tapes, and from one type of data to another; see "Remarks" column as well as the text for specifics.

Printed report **PR** Microfiche only **M** Summary tapes **ST**

(continued from front page)

and transportation, communications and utilities sectors registered modest growth on an annual basis in January, while a small yearly decline was experienced in the services sector. In the public sector, employment growth has slowed significantly over the past year as current federal fiscal policies designed to reduce nondefense government spending have had a generally negative impact on government employment at the federal, state and local levels in New Mexico.

After having declined for three consecutive quarters in 1981, bank demand deposits showed positive growth in the fourth quarter, with a yearly increase of 18.5 percent registered in January. Time deposits at commercial banks have grown at strong annual rates in recent months, and January was no exception as the yearly increase in this category measured 16.2 percent. The introduction of the tax-exempt All Savers Certificate in October and Individual Retirement Accounts at the start of this year has apparently contributed to increased savings at commercial banks.

In summary, the New Mexico economy has experienced limited growth in recent months, and this continued to be the case in January. Despite the modest growth of the state's economy, high interest rates continue to constrain statewide economic expansion, with the most pronounced negative impact occurring in the construction and manufacturing sectors. With respect to the short-term outlook, the federal income tax cut scheduled for July of this year and the continued easing of inflationary pressure as anticipated by most economists should together act to stimulate the state economy in the latter half of this year. In addition, should interest rates decline somewhat during the next several months in response to the moderation in the inflation rate, this could provide some relief for the construction and manufacturing industries in New Mexico.
